

ΔΙΑΛΕΞΗ

" Human Language Technologies @ GPLSIUA"

Estela Saquete

Professor

Department of Software and Computing systems,
University of Alicante

Περίληψη – Abstract

In this talk, the research field of Human Language Technologies as a part of Artificial Intelligence will be presented. It is also known within the Artificial Intelligence community as Natural Language Processing. GPLSI research group (<https://gplsi.dlsi.ua.es/gplsi13/en>), at University of Alicante, has been researching in this field since 1993 and the main research will be explained in the talk as well as current and future trends for this field research, such as automatically timeline creation from different documents and languages and fake news detection.

[Prof. Estela Saquete](#) is a faculty member in the University of Alicante. She received her PhD degree from the same university in 2005. Previously, she has also worked as a programmer and an analyst in academia and industry. Her research interests are in the area of Computational Linguistics.
